KENYAN SCHOOL PROJECT NEWSLETTER May 2018

Update on progress with Olemoncho Electric Fencing Project

Above photo of Olemoncho primary school

We are well on our way of reaching our **goal of \$7,878.00** to provide **Solar Powered Electric Fencing** for the Olemoncho Primary School. KSP is grateful for the generous donation from the Ramsey Shirk Fund of the Community Foundation for Monterey County.

To date we have raised \$4,278.00 – now **we need your help to raise an additional \$3,600 to reach our goal.**

At the end of May, we would like to tell the Olemoncho school that their fencing project is a go!

Why this is so important:

The school needs electric fencing to protect children from encounters with wildlife, which often lead to death for the animals and injury to the children.

If you have not yet supported this project, please consider making a gift, now.

[Click here to donate to KSP](#)

The pictures above and below show children playing in the school yard which is open. Current fencing is inadequate or missing altogether. Often the children must stay inside the classrooms to avoid contact with elephants and other wild animals. Even going to the outhouse or to the water spigot, can be risky

Roaming elephants are very dangerous, especially when mothers are protecting their young.

Please help us protect children and the elephants!
Your tax-deductible donation will go a long way for the
Olemoncho School.
Please donate now!
Every little bit helps!

The Kenyan School Project is grateful to receive both small and large contributions and we hope you will consider a tax-deductible contribution today. **We have no salaries – KSP is a 100% volunteer** organization so your contribution will go directly to funding the fencing for the Olemoncho school.

The **Kenyan School Project** is a small non-profit organization working to improve the lives of children in Kenya by promoting better educational opportunities and health. We take on one small project at a time.
